

- * Any housing or enclosure used for the keeping of animals or fowl shall be well drained, cleaned daily of animal excrement and free of objectionable odors and otherwise clean and sanitary. Animal excrement shall be disposed of in a manner approved by the XXXXX Health Department.
- * Each dog enclosed exclusively outside of a residence shall have a minimum of 100 square feet of space.
- * Each dog must be provided with a dog house that is of sufficient size for the dog to be able to stand up and move around, must have a floor that is elevated off the ground, with at least three sides and a roof that keeps moisture and wind out. Dog house must be filled with straw bedding to allow animal to warm itself in cold temperatures.
- * The dog must have access to clean unfrozen drinkable water 24/7 and provided sufficient nutritious food not less than once per day.
- * The animal's enclosure must provide it with shade and protection from heat stroke in the way of ventilation and change of air during warm temperatures.
- * During inclement weather, times of Heat Advisories or weather advisories such as hurricanes and tornadoes, animals are to be brought indoors.
- * Dogs must be provided exercise and socialization on a daily basis to prevent any dog from becoming aggressive and unapproachable.
- * The area where the animal is living must be free from infestations of flies, rodents and other pests.
- * For tethered dogs, see TETHER REQUIREMENTS.
